<b>Subject:</b>	Folder not writeable should be an "Error" not a "Warning"		
<b>Description</b>			
<p>The Install Tool checks for permissions in it's folder structure. Currently if files cannot be written to a directory this is considered a Warning. Thus it is not displayed with a "red badge" in the main menu of the Install Tool.</p> <p>But not being able to write to typo3temp, uploads or fileadmin might cause several other places to fail. Thus we should rise this status message to "Error" instead.</p>

[TASK] Folder not writeable should be an "Error" not a "Warning"

The Install Tool checks for permissions in it's folder structure. A folder (typo3temp, uploads, fileadmin) not being writeable now is an Error and not only a Warning thus displaying a red badge in the Install Tool main menu.

Resolves: #52407

Releases: 6.2
