

TYPO3.Flow - Bug # 52430

Status:	New	Priority:	Should have
Author:	Vladimir B	Category:	
Created:	2013-10-01	Assigned To:	
Updated:	2013-10-01	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Flow 2.0.0			
Subject:	Cannot convert from UUID to auto-increment ID		
Description			
Hi all			
I think I found a bug - when I tried to convert a model to use an auto-increment ID instead of the UUID, the doctrine:update failed with message:			
Uncaught Exception			
An exception occurred while executing 'ALTER TABLE mytable DROP persistence_object_identifier, CHANGE id id INT AUTO_INCREMENT NOT NULL':			
SQLSTATE[42000]: Syntax error or access violation: 1075 Incorrect table definition; there can be only one auto column and it must be defined as a key			
More Information			
Exception code #0			
File /flow/Packages/Libraries/doctrine/dbal/lib/Doctrine/DBAL/DBALException.php line 47
