TYPO3.Flow - Task # 52452

Status:	Resolved	**Priority:**	Should have
Author:	Tim Kandel	**Category:**	MVC - Routing
Created:	2013-10-02	**Assigned To:**	Tim Kandel
Updated:	2013-10-03	**Due date:**	

Sprint:	
PHP Version:	
Has patch:	No
Complexity:	
Subject:	Refactor router caching logic into a service

Description

Currently the logic for fetching the routing cache and creating it resides solely in the RouterCachingAspect. This makes it hard for us and for userland code to work with this cache without having to repeat the code. Instead of using the Aspect, there should be a Service that implements all neccessary methods.

Revision a60ef3c8 - 2013-10-03 12:43 - Tim Kandel

[TASK] Refactor router caching logic into a service

This change removes most of the logic from the
RouterCachingAspect and introduces it in the form of a new
RouterCachingService.

Revision 2a4a7f46 - 2013-10-15 18:18 - Bastian Waidelich

[TASK] Cleanup RouterCachingService

Some (mostly cosmetic) adjustments to our CGL and some
renamings to increase readability.

This also renames the misleading method Route::getMatchingUri()
by Route::getResolvedUriPath(). The old method is still available as
deprecated alias.

Revision d645b051 - 2013-10-15 18:19 - Bastian Waidelich

[TASK] Get rid of RouterCachingAspect

This moves code from the RouterCache AOP aspect to the Router itself
making the aspect redundant.

Before the cache handling of the Routing Framework has been extracted
to an AOP aspect in order to keep the Router code simple. Since the
introduction of the RouterCachingService (#52452) this is no longer
required.
