<b>Subject:</b>	Allow sorting and extending nodeTypeGroups in node type wizard		
<b>Description</b>			
<p>Currently the TYPO3.Neos.nodeTypeGroups is a simple array, and really hard to extend. This task propose a new synthax like:</p> <pre>Neos:   nodeTypeGroups:     general:       position: 'start'       label: 'General'     structure:       position: 100       label: 'Structure'     plugins:       position: 200       label: 'Plugins'</pre> <p>With this synthax, any package can add a new group, change ordering, or remove an existing group.</p>

[!!!][TASK] Make TYPO3.Neos.nodeTypes.groups extensible and sortable

This changes allows package authors to define their own nodeTypeGroups without having to overwrite the default settings. It also gets rid of the need for the integrator to redeclare every nodeTypeGroup in the Distributions Settings.yaml if he wants to add new ones.

The configuration of TYPO3.Neos.nodeTypes.groups changes to the following format::

```
TYPO3:
  Neos:
    nodeTypes:
      groups:
        general:
          position: 'start'
          label: 'General'
        structure:
          position: 100
          label: 'Structure'
```

This change is breaking because the "group" settings in the NodeTypes.yaml now has to use the key instead of the label and the Settings.yaml structure has changed.
