Revision 710b44e5 - 2013-10-08 00:14 - Christian Kuhn

[FEATURE] ext:install Core update

The patch provides the code infrastructure to test for possible
core updates using information from get.typo3.org and implements
a "one-click" update within "important actions".

The update itself is implemented as a list of ajax calls performed
after each other to have minimal impact and side effects to current
core code.

The service classes "CoreVersionService" and "CoreUpdateService"
contain the main business logic and may be used in a reports module
or scheduler task later on.

Testplan:

To test, just manipulate your version in core/Classes/Core/SystemEnvironmentBuilder.php to '6.2.0alpha2', the system should update to 6.2.0alpha3
then.
