

## Core - Bug # 52578

<b>Status:</b>	Resolved	<b>Priority:</b>	Must have
<b>Author:</b>	Oliver Hader	<b>Category:</b>	Install Tool
<b>Created:</b>	2013-10-07	<b>Assigned To:</b>	Christian Kuhn
<b>Updated:</b>	2014-03-21	<b>Due date:</b>	
<b>TYPO3 Version:</b>	6.2		
<b>PHP Version:</b>	5.3		
<b>Complexity:</b>			
<b>Is Regression:</b>	No		
<b>Sprint Focus:</b>			
<b>Subject:</b>	Install process removes permission		
<b>Description</b>			
<p>The initial server error reads like this:</p> <p>Forbidden</p> <p>You don't have permission to access /typo3/sysex/typo3/install/Start/Install.php on this server.</p> <p>The permission to the document root folder is modified and thus TYPO3 is currently locking out itself during the install process. Looks like \$GLOBALS['TYPO3_CONF_VARS']['BE']['folderCreateMask'] is used as targetPermission... So, either leave out the root node or find a way to determine the correct permission.</p> <p>In my case I get a</p> <p>Permission denied: /.../introduction/.htaccess pcfg_openfile: unable to check htaccess file, ensure it is readable, referer: http://.../typo3/sysex/typo3/install/Start/Install.php</p>

### History

#### #1 - 2013-10-07 16:17 - Oliver Hader

- Status changed from New to Accepted
- Priority changed from Should have to Must have

More stuff... the permissions are checked and modified for each request...

I think there is still room for improvements

#### #2 - 2013-10-07 16:34 - Oliver Hader

- Category set to Install Tool

#### #3 - 2014-03-21 14:58 - Ernesto Baschny

- Status changed from Accepted to Resolved
- Target version set to 6.2.0

Fixed with #52668
