TYPO3.Fluid - Bug # 52591

Status:	New	**Priority:**	Should have
Author:	Philipp Maier	**Category:**	
Created:	2013-10-07	**Assigned To:**	
Updated:	2013-10-07	**Due date:**	
Has patch:	No		
Affected Flow version:	Git master		
Subject:	The Pagination Widget broken for joined objects		

Description

In cases where objects are reconstructed through joins, setting the LIMIT leads to an incomplete result set.

Doctrine provides an Paginator for these purposes. The widget should use this paginator as soon as it is available in Flow (see: http://forge.typo3.org/issues/52590).

History

In the meantime you can fetch the QueryBuilder from the query object with the ObjectAccess methods (suggested by julle).
Then use the queryBuilder for the Paginator.

```
$queryBuilder = ObjectAccess::getProperty($query, 'queryBuilder', TRUE);
$paginator = new \Doctrine\ORM\Tools\Pagination\Paginator($modifiedObjects);
$modifiedObjects = $paginator->getIterator();
```
