

## TYPO3.Setup - Bug # 52605

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Soren Malling	<b>Category:</b>	
<b>Created:</b>	2013-10-08	<b>Assigned To:</b>	
<b>Updated:</b>	2013-10-08	<b>Due date:</b>	

**Subject:** "Setup password" tries to authenticate with TYPO3 Flow Security Account

### Description

Running latest composer release, trying to authenticate with the password written to SetupPassword.txt I get the following error

```
#2003: SQLSTATE[HY000] [2003] Can't connect to MySQL server on '127.0.0.1' (111)
```

From the screenshot [1] you can see that it tries to connect to the database and authenticate with the security account table and not the filebasedprovider
