[BUGFIX] Add domain model validators only once

If a domain model validator is present and a controller action accepts this domain model as argument, the validator is added twice to the validation tree.

It is added in

ValidatorResolver::buildMethodArgumentsValidatorConjunctions()
and in ValidatorResolver::addCustomValidators() which is called from ValidatorResolver::getBaseValidatorConjunction()

Both methods are called when building the validation tree in
ActionController::initializeActionMethodValidators()

Resolves: #52607

Releases: master, 6.2

History

#1 - 2014-03-18 13:45 - Andreas Allacher

Should be included before final v6.2 LTS

Currently the validators are called double. The issue was introduced most likely with this change:

<https://git.typo3.org/Packages/TYPO3.CMS.git/commit/66fb0ad5c6755089db014cd329357898632bf444>

because now the validator is found via buildMethodArgumentsValidatorConjunctions and buildBaseValidatorConjunction and added on both parts.

#2 - 2014-08-21 11:24 - Online Now! GmbH

Bug is still present in TYPO3 6.2.4. Also if you add an annotation @validate with the validator before a controller action, the validator gets executed three times. Only workaround in the mean time is to put the validators not in the \Domain\Validator directory or modify the Extbase source code.

#3 - 2014-09-25 15:24 - Alexander Opitz

- Project changed from Extbase MVC Framework to Core
- Category changed from Extbase: Validation to Extbase
- Target version changed from Extbase 6.2 to next-patchlevel
- TYPO3 Version set to 6.2
- Is Regression set to No

#4 - 2015-02-14 23:04 - Alexander Schnitzler

- Status changed from New to Accepted
- Assigned To set to Alexander Schnitzler

#5 - 2015-02-14 23:08 - Gerrit Code Review

- *Status changed from Accepted to Under Review*

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <http://review.typo3.org/36915>

#6 - 2015-02-20 11:30 - Anonymous
