**Subject:** Header navigation on smaller devices

### Description

What would be a nice way to handle the header navigation on the top-right on smaller devices?

My suggestion would be to hide it and add a placeholder - or - move it to the bottom.

Any suggestions?

### History

#### #1 - 2013-10-10 13:13 - Claas Reimer

- File *Neos-Website\_RL-10-2013\_Mobile.pdf* added

- % Done changed from 0 to 80

As promised please find attached the design for a mobile view of the page.

We should hide the download button and all links to external pages which are not optimised for mobile.

Also the interface experience by tooltips will not work on mobile - so better to show it by a movie (or a few movies to swipe through) or screenshots with additional text to swipe through.

Best regards

Claas

#### #2 - 2013-10-10 13:19 - Claas Reimer

- Assigned To set to *Henjo Hoeksma*

#### #3 - 2013-12-12 09:35 - Berit Hlubek

- Status changed from *New* to *Resolved*

- Assigned To changed from *Henjo Hoeksma* to *Berit Hlubek*

- % Done changed from 80 to 100

Closed, as the website is online.
