Revision 7fff86d8 - 2013-10-12 21:39 - Ernesto Baschny

[FEATURE] Allow to disable the "Core Updater" through an env-variable

By setting the environment variable "TYPO3_DISABLE_CORE_UPDATER=1" the Core Updater functionality is disabled in the Install Tool. This can be useful for providers which have it's own means of upgrading the Core.

Resolves: #52639

Releases: 6.2

Revision 4907c200 - 2013-10-12 23:12 - Ernesto Baschny

[FEATURE] Allow to disable "Core Updater": not only optically

Follow-up to "Allow to disable the "Core Updater" through an env-variable". Now it's not even possible to call the individual Ajax requests that do the update if it is disabled.

- % Done changed from 100 to 90

Not only TYPO3_DISABLED_CORE_UPDATER but also REDIRECT_TYPO3_DISABLED_CORE_UPDATER should be taken into account. The latter occurs when using PHP as CGI and Apache mod_rewrite.

#10 - 2013-10-28 20:36 - Ernesto Baschny

- Status changed from New to Resolved

Mathias, could you please elaborate what you mean? Under which circumstance will the environment variables be prefixed with "REDIRECT_"? I've never seen such a setup or scenario, would be great if you could provide some insights about this (i.e. a link to Apache or mod_rewrite documentation).

But then please add this as a new issue to the tracker, as this is a follow-up issue and we should not really reopen original issues for this but instead create new ones.

Thanks!

More explanation added to the followup issue #53188. Sorry for abusing this one. ;-)
