Subject:	Image element has no height when added

Description

When a image content element is added to the DOM it has no height so it can not be selected by mouse. After reload this is fixed.

[BUGFIX] Image placeholder is not rendered

When new image elements are added to the page the placeholder image
is not rendered anymore. This happens because of a regression which
was probably introduced because the new resource names where introduced
while I0789ee8d79ae9580c872b9131278db846328519f was already under
review.
