Sprint Focus:	

Subject:	Rename API for ApplicationContext

Description

In #50983 we have introduced a public API to get the current application context.

The API was:

\TYPO3\CMS\Core\Utility\GeneralUtility::getContext();

I suggest to change the API name to

\TYPO3\CMS\Core\Utility\GeneralUtility::getApplicationContext();

and use the term applicationContext in all other places.

[TASK] Rename API for ApplicationContext

Use the term "applicationContext" instead of "context",
because it is too general and could lead to confusion.

Resolves: #52678
Releases: 6.2
