Subject:	Placeholder property in some fields

Description

A happy little feature was introduced in 4.7 already, but never documented:

Some TCA fields (input / text?) can have a placeholder config option to hold a 'placeholder' value until user input was supplied.

See issue #33235 for the feature introduction and #52630 for a bugfix in this area.

[FEATURE] Placeholder attribute

Since TYPO3 CMS 4.7, a placeholder attribute is available
for fields of type input and text. This has been missing
from the documentation.

Furthermore, since 6.2 the placeholder configuration
can be a recursive pointer into related records.

Resolves: #52730
Releases: 6.2

History

#1 - 2013-10-14 14:17 - Ernesto Baschny

#52630 is not only a "bugfix", but allows to follow recursively a list of properties, i.e. used in sys_file_reference:
    'placeholder' => '__row|uid_local|metadata|title',

  - _row.uid_local refers to sys_file
  - sys_file.metadata refers to sys_file_metadata
  - sys_file_metadata.title <= this is the one to be shown

#2 - 2014-02-26 21:58 - Francois Suter

- Status changed from New to Accepted

- Assigned To set to Francois Suter

- Target version set to 6.2.0

#3 - 2014-02-26 22:30 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** of project **Documentation/TYPO3/Reference/Tca** has been pushed to the review server.

It is available at https://review.typo3.org/27885

#4 - 2014-02-26 22:32 - Francois Suter

Note: I'm not going to backport this to older versions of the TCA Reference as I think it's not worth the effort. We already have so much to do, I would rather concentrate on delivering squeaky clean documentation for 6.2 rather than providing fixes for older versions, except for critical issues.
