[TASK] File-List should allow quick access to translations

File-Metadata has been configured to be translatable.

In List-Module we are used to also see the translated records. To help editors this possibility is introduced to the file list to.

Based on the fact that for a file all listed properties would be the same than in every language, a different implementation has been used.

The icons and the formatting is preliminary and subject to be changed by the usability team.

Resolves: #52817

Releases: 6.2
