[FEATURE] Enable frontend to show translated file metadata

The frontend should show translated file metadata.

Since translation is not the concern of a file abstraction layer and the FAL does not know about frontend language settings this concern has to be decoupled.

For that purpose the MetadataRepository has been extended with an signal which is fired before the metadata-record is returned. In Frontend-Context a Slot is registered which passes that record through the according functionality in \TYPO3\CMS\Frontend\Page\PageRepository::getRecordOverlay so that a clean language and workspace overlay happen according to the settings of TSFE.

Releases: 6.2

Revision 60670fb6 - 2013-10-15 22:34 - Christian Kuhn

[BUGFIX] Incomplete mock in ext:frontend FAL getData test

The patch for #52818 triggered a failing test for ext:frontend
getData(). The patch mocks a File Resource properly to not test
FAL internals, but only the getData() logic.
