

## TYPO3.Neos - Bug # 52911

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Christopher Hlubek	<b>Category:</b>	
<b>Created:</b>	2013-10-17	<b>Assigned To:</b>	Christopher Hlubek
<b>Updated:</b>	2013-10-19	<b>Due date:</b>	
<b>Subject:</b>	Fix PrimaryContent default TypoScript		
<b>Description</b>			
<p>The TYPO3.Neos:PrimaryContent TypoScript object is broken since no nodePath can be set easily by an integrator.</p> <p>The API should be usable like this:</p> <pre>page.body.content.main = PrimaryContent page.body.content.main.nodePath = 'main'</pre> <p>This needs a new TypoScript feature to allow properties on a Case object that are not used as matchers and results in the following TS:</p> <pre>prototype(TYPO3.Neos:PrimaryContent) &lt; prototype(TYPO3.TypoScript:Case) {   nodePath = 'to-be-defined-by-user'    @override.nodePath = \${this.nodePath}   @ignoreProperties = \${['nodePath']}   default {     prototype(TYPO3.Neos:ContentCollection) {       nodePath = \${nodePath}     }     condition = \${true}     type = 'TYPO3.Neos:ContentCollection'     @position = 'end'   } }</pre> <p>This will use the configured nodePath property on the PrimaryContent object and puts that into the context for rendering the matcher. The default matcher defines a nested prototype that assigns the nodePath from the context to the nodePath property of the ContentCollection.</p>

[BUGFIX] Make nodePath property configurable on PrimaryContent object

The PrimaryContent prototype is not easily usable after the refactoring from PrimaryContentCollection.

This change allows to configure the nodePath on the PrimaryContent object which will be used on the default ContentCollection to render the correct nodes.

The rendering functional test is updated to include testing of the PrimaryContent object.
