<b>Subject:</b>	TYPO3 Neos detailed system requirements		
<b>Description</b>			
<p>Could You show detailed system requirements to install TYPO3 Neos ?</p> <p>Maximum what I found is requirements for FLOW3 : <a href="http://docs.typo3.org/flow/TYPO3FlowDocumentation/TheDefinitiveGuide/PartII/Requirements.html">http://docs.typo3.org/flow/TYPO3FlowDocumentation/TheDefinitiveGuide/PartII/Requirements.html</a></p> <p>But it's quite tiny.</p> <p>I saw, what Robert develops on Mac, but it's not quite open source, so is there any detailed system requirements to run TYPO3 Neos on Debian or Ubuntu Server ?</p> <p>Thanks.</p>
