

## TYPO3 Flow Base Distribution - Bug # 52938

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Lorenz Ulrich	<b>Category:</b>	
<b>Created:</b>	2013-10-18	<b>Assigned To:</b>	
<b>Updated:</b>	2013-10-18	<b>Due date:</b>	

**Affected Flow version:** Flow 2.0.0

**Subject:** Resource stream wrapper doesn't work with foreign package

### Description

Using the resource stream wrapper (tested from Fluid) always generates links pointing to the origin package.

Example: An inline CSS in the Fluid template of package **Acme.Test**:

```
background-image: url(resource://Acme.Demo/Public/Images/pdf.png);
```

This will generate the following output:

```
background-image: url(http://mydomain.tld/_Resources/Static/Packages/Acme.Test/Images/pdf.png);
```

instead of

```
background-image: url(http://mydomain.tld/_Resources/Static/Packages/Acme.Demo/Images/pdf.png);
```
