

Core - Bug # 52946

Status:	New	Priority:	Should have
Author:	Soren Malling	Category:	Backend API
Created:	2013-10-18	Assigned To:	Mathias Schreiber
Updated:	2015-06-18	Due date:	
TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	ExtensionUtility::configurePlugin doesn't set typoscript		
Description			
Upgrading to 6.2 beta 1 I've experienced that			
TYPO3\CMS\Extbase\Utility\ExtensionUtility::configurePlugin -> \TYPO3\CMS\Core\Utility\ExtensionManagementUtility::addTypoScript doesn't register/writes the typoscript to the TypoScript Object Browser.			
It writes it very well to \$GLOBALS['TYPO3_CONF_VARS']['FE']['defaultTypoScript_' . \$type . '.']			
This seems to be a issue for Extbase only extension as EXT:gridelements got it's typoscript written as it used to

History

#1 - 2013-10-18 11:49 - Soren Malling

Title is wrong, is was TYPO3\CMS\Extbase\Utility\ExtensionUtility::configurePlugin and *not* the registerPlugin function

#2 - 2013-10-18 12:41 - Markus Klein

- Subject changed from TYPO3\CMS\Extbase\Utility\ExtensionUtility::registerPlugin doesn't set typoscript to ExtensionUtility::configurePlugin doesn't set typoscript

#3 - 2013-11-14 14:46 - Jo Hasenau

FYI: Gridelements does not use addTypoScript at all, but uses addStaticFile instead.

I think the difference is, that you have to include the static file then, while addTypoScript would insert the TS-code directly.

#4 - 2014-02-04 11:48 - Daniel Siepmann

Adding a line to add it to the static typoscript FILE will work:

```
$GLOBALS['TYPO3_CONF_VARS']['FE']['defaultTypoScript_' . $type . '.']['cssstyledcontent/static/v4.6/'] .= $content;
```

That's not a fix, but workaround where you've to change the core.

I try to figure out what's the problem.

A better way, working for me, is to edit `em_conf` of your extension and add `css_styled_content` as *depends*.

Hope the bug will be solved soon, so we don't have to add the core extension as dependency.

- Assigned To set to Mathias Schreiber

Hey Daniel,

any progress here?

#6 - 2015-01-26 16:48 - Daniel Siepmann

No sorry. I went on to other issues.

#7 - 2015-03-18 11:48 - Daniel Siepmann

As mentioned in slack, my opinion would be to add `css_styled_content` as suggested into `ext_emconf` of `extbase`. As `css_styled_content` is just one way to display content of TYPO3, and `extbase` supports this way, it is no dependency.

We just need to take care, whether `PackageStates.php` will follow the suggestions as it follows the dependencies.
