Subject:	TestRunner throws ReflectionException (PHP6)		
Description	<p>The TestRunner throws a ReflectionException, no matter what testcase I try to run. It tries to create a new ReflectionClass for a non existing class name - however it gets that class name (with the asian characters) from the get_declared_classes() function.</p> <p>Fatal error: Uncaught exception 'ReflectionException' with message 'Class �������� does not exist' in /Users/Shared/Sites/t3dev/typo3_5.0/typo3_5.0/Packages/Testing/Classes/T3P_Testing_TestRunner.php:68 Stack trace: #0 /Users/Shared/Sites/t3dev/typo3_5.0/typo3_5.0/Packages/Testing/Classes/T3P_Testing_TestRunner.php(68): ReflectionClass->+construct('�������� ?���� ??') #1 /Users/Shared/Sites/t3dev/typo3_5.0/typo3_5.0/Packages/Framework/Classes/TYPO3.php(109): T3P_Testing_TestRunner->run() #2 /Users/Shared/Sites/t3dev/typo3_5.0/typo3_5.0/index.php(32): TYPO3->run() #3 {main} thrown in /Users/Shared/Sites/t3dev/typo3_5.0/typo3_5.0/Packages/Testing/Classes/T3P_Testing_TestRunner.php on line 68</p>		

History

I supposed that this is a PHP bug and issued a bug report:

<http://bugs.php.net/bug.php?id=41482>

#2 - 2007-05-24 09:32 - Robert Lemke

(In r226)

- Framework: Raised the required PHP version to 6.0.0 - I don't see another way at the moment as we already need important features of PHP6 and can't code around it.
- Testing: Added a check for the existance of a class to avoid the ReflectionException. Addresses #53.

#3 - 2007-12-06 17:23 - Robert Lemke

- Status changed from New to Closed
- Sprint set to fixed

#4 - 2008-07-01 17:24 - Robert Lemke

- Target version deleted (1)
