TYPO3.Flow - Bug # 53010

Status:	Resolved		Priority:	Must have
Author:	Stephan Schuler		Category:	Security
Created:	2013-10-21		Assigned To:	
Updated:	2014-08-26		Due date:	
PHP Version:				
Has patch:	No			
Complexity:				
Affected Flow version: Git master				
Subject:	UsernamePasswordHttpBasic disabled since .htaccess strips "Basic"			
Description				

Hey there.

The Token\UsernamePasswordHttpBasic requires the "Authentication" header to begin with "Basic". That's fine since this very token is only meant to deal with basic auth requests.

Unfortunately the .htaccess file which gets installed contains the following line:
    SetEnvIfNoCase Authorization "Basic ([a-zA-Z0-9\+/=]+)" REMOTE_AUTHORIZATION=$1

This means: Whenever the "Authorization Basic" header is set, it gets passed to the REMOTE_AUTHORIZATION environment variable by stripping the "Basic" string.

[BUGFIX] REMOTE_AUTHORIZATION strips "Basic" string

Currently the .htaccess file passes the "Authorization" header
to the REMOTE_AUTHORIZATION environment variable by stripping
the "Basic" string. This means as soon as the authentication
token tries to authenticate, the only remaining thing is the
base64 encoded value of username/password without the "Basic"
indicator. This leads to no basic auth possible when running
CGI.
