TYPO3.Form - Bug # 53031

Status:	Resolved	**Priority:**	Should have
Author:	Sebastian Kurfuerst	**Category:**	
Created:	2013-10-22	**Assigned To:**	Sebastian Kurfuerst
Updated:	2013-10-22	**Due date:**	
Subject:	when traversing back to a previous form step, make sure the current values are saved nevertheless		
Description			

Steps to reproduce:

 - Create a form with multiple pages.
 - fill in things on the 1st and 2nd page
 - then go back to **1st** page
 - then go forward to **2nd** page
 - now, the form elements filled in on 2nd page are not filled anymore.

Furthermore, we only want to trigger validation if we "forward", so while
going back, validation should not be triggered, but the values shall be stored.

[BUGFIX] when traversing back to a previous form step, make sure the current values are saved nevertheless

Steps to reproduce:

 - Create a form with multiple pages.
 - fill in things on the 1st and 2nd page
 - then go back to **1st** page
 - then go forward to **2nd** page
 - now, the form elements filled in on 2nd page are not filled anymore.

Furthermore, we only want to trigger validation if we "forward", so while
going back, validation should not be triggered, but the values shall be stored.

We also add functional tests for this case.
