| Sprint Focus: | | | |
| Subject: | Installation/uninstallation silently fails if PackageStates.php is not writable | | |
| Description | <p>Given I would like to install/uninstall an extension and PackageStates.php is not writable the process silently fails (BE reloads the extension list, CLI exits without any message)</p> <p>With TYPO3 4.x, there was an error message shown when trying to install/uninstall an extension and localconf.php was not writable. I would find it useful to have this "feature" back in 6.2</p> <p>I'll push a patch to Gerrit with a first attempt to solve this. As it requires a modification to the PackageManager, I'm not sure if that's the way to go, so feedback is appreciated.</p> | | |
