

TYPO3 Flow Base Distribution - Bug # 53180

Status:	New	Priority:	Must have
Author:	Carsten no-lastname-given	Category:	Build Process
Created:	2013-10-28	Assigned To:	
Updated:	2013-11-26	Due date:	
Affected Flow version: Flow 2.0.0			
Subject:	InjectSettings doesnt work on inheritance (Level 2)		
Description			
<pre>abstract foo{ public function injectSettings(\$settings)... }</pre>			
<pre>bar extends foo{}</pre>			
<pre>baz extends bar{}</pre>			
Creating a new Instance with ObjectManager: Result: baz::settings is NULL.			
This is caused by the Proxy Classes. InjectSettings is skipped on class inheritances over more then 2 levels			

History

Confirmed. Also, my initializeObject() of the base class is not called.
