

TYPO3.Neos - Bug # 53276

Status:	Closed	Priority:	Should have
Author:	Andreas Sander	Category:	JavaScript
Created:	2013-11-01	Assigned To:	
Updated:	2014-10-04	Due date:	
Subject:	Uncaught TypeError: Cannot call method 'replace' of undefined (ContentModule-built.js)		
Description			
The JS Error:			
Uncaught TypeError: Cannot call method 'replace' of undefined			
inside <i>ContentModule-built.js</i> occurs after:			
<ol style="list-style-type: none">1. Creating a new image element2. Click on the placeholder image inside to change it3. Click on an image inside the media explorer			
<pre>define("Shared/Utility", ["emberjs"], function(e) { return e.Object.extend({isValidJsonString: function(e) { return !/[^,;:{}\[\]0-9.\-+Eaeflnr-u \n\r\t]/.test(e.replace(/"(\. \[^\])"/g, "")) }}).create()</pre>			
e seems to be undefined here while trying to access it.

- Status changed from New to Closed

Thanks for your bug report.

I tried to reproduce your scenario in Neos 1.1.2. But the behavior is as expected.

Please try to update to Neos 1.1.2 and check it there. If there is still an issue just create a new ticket on <https://jira.typo3.org/>
