Subject:	When creating a new Site package, one can't add any content to the "Home" site		
Description			
<p>As written in the subject. When creating a new site during the setup Neos 1.0 alpha7, the page is created successfully but you can't add any content to the site. All buttons are grayed out.</p> <p>There is a fix by creating an entirely new page. So, something seems to be broken.</p> <p>You can see in the attached screenshots.</p> <p>Greetings, Thomas</p>
