

## TYPO3.Flow - Bug # 53350

<b>Status:</b>	Accepted	<b>Priority:</b>	Should have
<b>Author:</b>	Marc Neuhaus	<b>Category:</b>	MVC - Routing
<b>Created:</b>	2013-11-05	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2013-11-05	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> Git master			
<b>Subject:</b>	Trying to create a Link in an Template in CLI Context should provide a helpful exception		
<b>Description</b>			
<p>If you try to render a FluidTemplate with a link in it through a CommandController it fails currently with this error:</p>			
<p>Uncaught Exception Could not resolve a route and its corresponding URI for the given parameters. This may be due to referring to a not existing package / controller / action while building a link or URI. Refer to log and check the backtrace for more details.</p>			
<p>This happens, because the router isn't configured by default in the cli context and needs to be configured manually.</p>			
<p>We should provide a more helpful exception here to tell the dev what he needs to do</p>			

### History
