Subject:	Use getPagesTSconfig($tscPID) only once per ID

Description

PageLayoutView::isRTEforField is called on every record that is displayed in a Web>Page. And this will call BackendUtility::getPagesTSconfig($tscPID) every time once and again, and thus parsing the PageTS over and over on the same hit. If you have 50 content elements on a page, this can get very expensive.

Solution: Create a variable that stores the RTEsetup for a particular ID

[BUGFIX] Use getPagesTSconfig($tscPID) only once per ID

PageLayoutView::isRTEforField is called on every record that is
displayed in a Web>Page. And this will call
BackendUtility::getPagesTSconfig($tscPID)
every time once and again,
and thus parsing the PageTS over and over on the same hit.
If you have 50 content elements on a page,
this can get very expensive.

Solution: Create a variable that stores the RTEsetup for
 a particular ID

Resolves: #53368
Releases: 6.2
