Subject:	PackageFactory class not found while running install-tool in 6.2

Description

Hi,

building on a normal typo3temp dir I come to the point :
TYPO3\CMS\Core\Package\PackageFactory' not found in /share/anahata/typo3/sysext/core/Classes/Package/PackageManager.php on line 100

Looks like some namespacing is wrong ?
I'm testing migration from TYPO3 6.1.5 to 6.2 - nothing special in setup/extensions etc.

Hello Frank,

thank you for reporting that issue. There happened much patchwork in the last months.

Could you please try if this error still occurs on current master?

Thanks!
