Sprint Focus:			
Subject:	sys_file.metadata does not use TCA type inline		

Description

The field sys_file.metadata defines the TCA property "foreign_field" that is only defined for the TCA type "inline". Using "foreign_field" with the select type does not make much sense, since select elements can be seen as m:n reference that is persisted with each parent record and thus could have multiple parents.

[BUGFIX] sys_file.metadata does not use TCA type inline

The field sys_file.metadata defines the TCA property
"foreign_field" that is only defined for the TCA type "inline".
Using "foreign_field" with the select type does not make much
sense, since select elements can be seen as m:n reference that
is persisted with each parent record and thus could have
multiple parents.
