

## TYPO3.Flow - Bug # 53620

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Rafael Kähm	<b>Category:</b>	Package
<b>Created:</b>	2013-11-13	<b>Assigned To:</b>	
<b>Updated:</b>	2014-01-01	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> Git master			
<b>Subject:</b>	Move Classes/TYPO3/Flow/Composer to own Package		
<b>Description</b>			
<p>By installing TYPO3 Flow or neos you get warnings on each dependency package "Class TYPO3\Flow\Composer\InstallerScripts is not autoloadable, can not call post-package-install script".</p> <p>Composer tries to call a script for "post-package-install"-event before TYPO3.Flow is installed and prints warnings (see <a href="https://github.com/composer/composer/blob/2b36106168e89fa185dfa604a1666fd1b188384e/src/Composer/EventDispatcher/EventDispatcher.php#L128-L131">https://github.com/composer/composer/blob/2b36106168e89fa185dfa604a1666fd1b188384e/src/Composer/EventDispatcher/EventDispatcher.php#L128-L131</a> ).</p> <p>InstallerScripts must be available earlier.</p> <p>Possible solution:</p> <ol style="list-style-type: none"><li>1 moving Classes/TYPO3/Flow/Composer to TYPO3.InstallerScripts</li><li>2 in "Classes/TYPO3/InstallerScripts/Package" postPackageUpdateAndInstall() and check if TYPO3.Flow package is available first and then proceed ...</li><li>3 add "TYPO3.InstallerScripts" to dependencies at second place(after "php": "&gt;=5.3.2",) in Packages/Framework/TYPO3.Flow/composer.json</li></ol>

### History

#### #1 - 2013-11-13 18:32 - Rafael Kähm

I can not find review or issue for adding postPackageUpdateAndInstall() and runPackageScripts() methods in Classes/TYPO3/Flow/Composer/InstallerScripts.php, can somebody show where it is?

#### #2 - 2013-12-11 20:21 - Bastian Waidelich

Apparently this is a composer issue. The message can be ignored, see <http://forum.typo3.org/index.php/t/200300/>

This happens, because in composer.json from Flow-base-distribution is "post-package-install" - script is defined before this script is available.

```
....  
"scripts": {  
  ....  
  "post-package-install": "TYPO3\\Flow\\Composer\\InstallerScripts::postPackageUpdateAndInstall"  
}
```

This behavior by installing Flow/Neos is deceptive for newcomer.
