Subject:	FAL fetches storages twice on every BE request		
Description	<p>FAL fetches the storages twice on every request.</p> <pre>1SELECT COUNT(uid) FROM sys_file_storage WHERE 1=1; 2SELECT * FROM sys_file_storage WHERE 1=1 AND sys_file_storage.hidden=0 AND sys_file_storage.deleted=0;</pre> <p>StorageRepository->findAll() tries to detect if there's ever been a storage, and if not so it creates one for /fileadmin.</p> <p>Maybe this can be optimized somehow to have only one DB access.</p>

Hi Markus,

as this doesn't happen on fully cached frontend requests, can you write down what types of requests this happen?

#2 - 2013-11-18 10:31 - Markus Klein

Yes looks like this only happens in the BE.

#3 - 2013-11-18 18:49 - Markus Klein

- Subject changed from FAL fetches storages twice on every request to FAL fetches storages twice on every BE request

#4 - 2013-11-20 01:28 - Philipp Gampe

IMHO this magic create storage stuff should be moved to the install tool as an upgrade wizard.

#5 - 2013-12-02 15:33 - Markus Klein

- Parent task set to #52949

#6 - 2014-01-31 14:21 - Ingo Schmitt
- Status changed from New to Resolved

Was fixed by issue #55186
