Subject:	compiled CSS files still contains SASS code		
Description			
<p>The compiled and delivered CSS Files in the public resources still contains uncompiled SASS Code:</p> <p>e.g. Includes-build.css line 160ff:</p> <pre>[...] .neos { @-moz-keyframes spin { 0% { -moz-transform: rotate(0deg); } 100% { -moz-transform: rotate(359deg); } } }</pre> <p>[...]</p>

Thanks for your bug report.

As far as I understood @-moz-keyframes is a normal CSS rule. See <https://developer.mozilla.org/en-US/docs/Web/CSS/@keyframes>. So I guess our SASS compiling is working fine.

If the problem still exists please open an issue on <https://jira.typo3.org/>
