Subject:	Allow assigning a preset as default preset for the Form		
Description			
<p>Currently, the FormBuilder loads every form with the defaultPreset. If an element configuration is not available in the default preset, the form won't load. Therefore it would be nice if a preset could be assigned to a form and stored in the form definition.</p> <p>This also needs a change in the YamlPersistenceManager of TYPO3.Form.</p>
