[CLEANUP] Enhance RTE Magic Image FAL migration wizard

If the RTE magic images FAL migration upgrade wizard in the install tool ever fails (due to max_execution_time) or some SQL error, then the migration stops and can be run again.

However, if the wizard is run again, it always checks if the source file still exists. The wizard should rather check if the target file exists, if not, move the source file to the target file.

As a separate "step" in this wizard, if the target file (already) exists, then the DB change can be done.

Additionally, a typo for the output is fixed as well.

Resolves: #53846

Releases: 6.2
