

TYPO3.Neos - Bug # 53876

Status:	Closed	Priority:	Should have
Author:	Pascal no-lastname-given	Category:	
Created:	2013-11-22	Assigned To:	
Updated:	2014-10-02	Due date:	
Subject:	Setup fails with Internal server error		
Description			
<p>When trying to install beta1 into a new database which name contains a blank (or any other invalid character?), the setup terminates after the 'Create an administrator account' screen displaying an Internal Server Error.</p> <p>The error log shows: 'Allowed memory size of xxxx bytes exhausted' and the first line of the stack trace file: --- Uncaught exception #1353085860 in line 53 of /www/TYPO3-Neos-1.0/Data/Temporary/Production/Cache/Code/Flow_Object_Classes/TYPO3_Flow_Security_AccountFactory.php: The role with identifier "TYPO3.Neos:Administrator" is unknown --- (stack trace attached)</p> <p>[workaround: remove the blank in the DB]</p>

History

#1 - 2013-11-25 16:20 - Pascal no-lastname-given

See the related issue for the cause of the memory error

#2 - 2014-10-02 13:26 - Jonas Renggli

- Status changed from New to Closed

Now there are nice error messages ("Could not connect to database") and there are even spaces in database names allowed...

Can't reproduce this under Neos 1.1.2

If the problem still exists please open an issue on <https://jira.typo3.org/>
