

TYPO3.Flow - Bug # 53931

Status:	Resolved	Priority:	Should have
Author:	Sebastian Kurfuerst	Category:	MVC
Created:	2013-11-25	Assigned To:	Sebastian Kurfuerst
Updated:	2014-07-11	Due date:	
PHP Version:	5.3		
Has patch:	Yes		
Complexity:			
Affected Flow version: Flow 2.0.0			
Subject:	ActionRequest should not serialize parent HTTP request		
Description			
<p>When working with WebRedirects and authentication, the intercepted request is serialized with the security context. While it makes sense to do so, we should not include the reference to the base HTTP request in this case, as this includes lots of cruft like \$_SERVER etc.</p>

[BUGFIX] ActionRequest should not serialize parent HTTP request

When working with WebRedirects and authentication, the intercepted request is serialized with the security context. While it makes sense to do so, we should **not** include the reference to the base HTTP request in this case, as this includes lots of cruft like \$_SERVER etc.

In order to test this, just look at the serialized session files when a web redirect is taking place.
