<b>Updated:</b>	2014-10-04	<b>Due date:</b>	
<b>Subject:</b>	Misleading behaviour in MAMP PRO		
<b>Description</b>	<p>In my MAMP PRO install most of the cli ./flow commands I used ran into memory problems: PHP Fatal error: Allowed memory size of 33554432 bytes exhausted.</p> <p>After raising the limit several times, even up to 640M, the problem remained.</p> <p>After some digging around I found out MAMP PRO uses a different php.ini for cli commands.</p> <p>Not a FLOW or Neos problem but this might be worth mentioning in the docs, preventing a lot of frustration and broken keyboards... ;-)</p>		
<b>Related issues:</b>	related to TYPO3.Neos - Bug # 53876: Setup fails with Internal server error <b>Closed</b> <b>2013-11-22</b>		

### History

- Status changed from New to Closed

There might be a requirements check in the setup of Neos in the future so you will get a warning message if your memory limit is to low.

I added the requirement of a php-cli memory limit check to this task, which is in my opinion the best solution to avoid these problems in generell.

See: <https://jira.typo3.org/browse/NEOS-506>

I also moved this to Jira: <https://jira.typo3.org/browse/NEOS-540>
