Subject:	Use Cases for NEOS (vs. 6.x Tree)		
Description			
<p>Hey everyone,</p> <p>here I am pointing out that it be great to provide a graphic or accordeon slider to visually explain some sample scenarios for using NEOS (i.e. my guess is it would be more interesting for tech evangelists, startups and new users vs. 6.x which is likely to be more interesting for firms that already use 4.5)</p> <p>The reality is, Typo3 can not maintain both branches forever. Someday Typo3 "7" will no longer be the focus and NEOS should be where our energies flow to (in my case of conceptual nature as I am not a real programmer per se but rather a former tech journalist and sys admin.)</p> <p>Look forward to your feedback. Thanks for listening.</p> <p>Andrew</p>
