Revision 78efef80 - 2014-11-26 10:35 - Carsten Bleicker

[FEATURE] Respect implementation of JsonSerializerizable interface

The JsonView will call jsonSerialize() in transformValue() for objects implementing the JsonSerializerizable interface. This is useful if a domain model or data transfer object needs custom serialization logic for JSON.

The implementation also works in PHP 5.3 where the JsonSerializerizable interface is not yet present and will be ignored.
