Revision e832e80e - 2013-12-02 20:19 - Stefan Neufeind

[BUGFIX] ClientUtility does not detect Internet Explorer 11

Since the Release of Microsoft IE 11 there is no "MSIE" hint in
its user agent header anymore. Therefore the existing patterns
fail and the browser is detected as unknown browser.

TYPO3 deactivates several features for unknown browser. As a
result f.e. the RTE does not load.

This change adds special treatment for IE11+ by introducing an
additional regular expression matching the new user agent format
and looking for the Trident engine to be present.

In addition unit tests for common IE 9-11 user agents are added.

Patch set 4 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.
It is available at https://review.typo3.org/25848

#5 - 2013-12-02 16:20 - Stephan Großberndt

The user agent of MSIE 11 was changed deliberately not to be identified as msie anymore:

Compatibility changes in IE11: http://msdn.microsoft.com/en-us/library/ie/bg182625%28v=vs.85%29.aspx

"In general, you should avoid detecting specific browsers or browser versions. The assumptions underlying such tests tend to lead to false positive results when browsers are updated. Instead, detect features as you need them and use progressive enhancement to provide simplified experiences for browsers or devices that do not support the features you need."
