

## TYPO3.Fluid - Feature # 54196

<b>Status:</b>	Resolved	<b>Priority:</b>	Could have
<b>Author:</b>	Adrian Föder	<b>Category:</b>	ViewHelpers
<b>Created:</b>	2013-12-04	<b>Assigned To:</b>	Adrian Föder
<b>Updated:</b>	2013-12-07	<b>Due date:</b>	
<b>Has patch:</b>	No		
<b>Subject:</b>	IfHasValidationError ViewHelper		
<b>Description</b>	<p>to cope with the practice done by common CSS frameworks where a specific form field's parent element must/should have a particular error CSS class, I suggest introducing a ViewHelper which then will be used like</p> <pre>1 &lt;div class="row {f:form.ifHasValidationError(property: 'some.emailAddress', then: 'has-error')}"&gt;&lt;input...&gt;&lt;/div&gt;</pre>		

### Associated revisions

#### Revision c4d4db3a - 2013-12-04 14:40 - Adrian Föder

[FEATURE] Introduce Validation.IfHasErrors ViewHelper

This allows to check whether validation errors adhere to the current request, or if there is such an error for a particular property path.

Change-Id: I538cb1d9e25d5525784f26a5ec3346a6eb36751a

Resolves: #54196

Releases: master

#### Revision 49dfdbe5 - 2013-12-06 18:29 - Adrian Föder

[TASK] Move f:form.validationResults view helper to f:validation.results

Moves the validationResults ViewHelper to the ``validation`` namespace for consistency reasons.

If you use this ViewHelper you should update your Fluid templates from::

```
<f:form.validationResults>...</f:form.validationResults>
```

to::

```
<f:validation.results></f:validation.results>
```

Related: #54196

Releases: master

### History

#### #1 - 2013-12-04 13:34 - Adrian Föder

I come up with a proposal additionally, could this go into a `Validation` sub-namespace like

```
<f:form.validation.ifHasError property="some.email" />
```

In the future, the current ValidationResults VH could be moved into that NS, too.

I like the idea of moving it, but it should not be in "form" IMO, but:

```
<f.validation.results />  
<f.validation.hasErrors />
```

BTW: The "property" argument should be optional

## #3 - 2013-12-04 13:36 - Philipp Maier

+1 That would even work without breaking anything.

## #4 - 2013-12-04 13:37 - Adrian Föder

Bastian good point because when again thinking about it it's not even bound to any form; the stuff is stored in the request, so it's quite correct!

## #5 - 2013-12-04 14:42 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.Fluid** has been pushed to the review server.

It is available at <https://review.typo3.org/25949>

## #6 - 2013-12-04 16:42 - Adrian Föder

the moved validation.results ViewHelper changeset is here: <https://review.typo3.org/#/c/25953/>

## #7 - 2013-12-07 12:36 - Adrian Föder

- Status changed from Under Review to Resolved

- % Done changed from 0 to 100

Applied in changeset commit:c4d4db3afcfb4fbc3a4b66b3c4c14813929f34df.
