

TYPO3.Neos - Bug # 54210

Status:	Resolved	Priority:	Should have
Author:	Thomas Hempel	Category:	UI
Created:	2013-12-05	Assigned To:	
Updated:	2013-12-22	Due date:	
Subject:	Dateselector goes forward but not backwards		
Description	<p>I know that Neos is for the future but it would be cool if the dateselector in the inspector could go back in time. ;-)</p> <p>Seriously, only the arrow to the right works. The arrow to the left (go back in time) also goes forward.</p>

[BUGFIX] Dateselector should do "previous" too

The dateselector incorrectly only moves forward regardless of the arrow clicked, it should go back on the left arrow and forward on the right arrow.

Credits for finding the broken part go to Thomas Hempel. Thanks!

History

#1 - 2013-12-22 09:34 - Thomas Hempel

There is an easy fix for this but I can't provide a patch

In the ContentModule-built.js

At position 378,500557-499338

There you'll find something like

```
r[0].className=="neos"?-1:1
```

This has to be

```
r[0].className="neos-prev"?-1:1
```

There is also another version in the file query-with-dependencies.js. In line 36332 (seriously?) you'll find

```
var dir = DPGlobal.modes[this.viewMode].navStep * (target[0].className == 'prev' ? -1 : 1);
```

Should be

```
var dir = DPGlobal.modes[this.viewMode].navStep * (target[0].className == 'neos-prev' ? -1 : 1);
```

I have no idea how all this works together and only if I changed it the "built" file, it has an effect.

Can someone please merge this asap?

Thanks and Greets,

Thomas
