TYPO3 Version:	6.2		
PHP Version:			
Complexity:	medium		
Sprint Focus:			
Subject:	Optimize Performance and DB Queries for FAL		

Description

- make MetaData lazy loaded again

- think of joined loading of FileData in conjunction with ProcessedFiles or FileReferences

- Optimize Indexes

- think of a way using files without DB record loading?

Subtasks:

Task # 55186: Prevent Storages to be queried over and over again	**Resolved**

History

#1 - 2013-12-06 12:11 - Markus Klein

What do you mean with the last point?

#2 - 2013-12-07 15:53 - Steffen Ritter

- Parent task set to #54266

#3 - 2014-01-15 14:18 - Steffen Ritter

if files are requested by identifier for example - create an "wrapper" object which does not have any indexed data - if the use case only uses properties like (publicURL or getParentFolder) than the data would not be needed.

Only if a "slow property" is queried the index data could be fetched. but depending on the use case this could be even worse......
