Subject:	Aloha: Make it possible to configure options via YAML		
Description			
<p>It should be possible to define what formatting options are available (per NodeType). Currently we can add new options e.g.</p> <pre>'TYPO3.Neos.NodeTypes:Headline': properties: title: ui: aloha: format: ['h4']</pre> <p>But we can't remove existing options. We should turn the array into a map, so instead of:</p> <pre>format: ['b', 'i', 'u', 'sub', 'sup', 'p', 'h1', 'h2', 'h3', 'pre', 'removeFormat']</pre> <p>something like</p> <pre>format: 'b': TRUE, 'i': TRUE, ...</pre>

[TASK] Overwritable Aloha options YAML settings

Setting Content Element's Aloha settings now is "DIP switchable", i.e. the options are not anymore in a single array, but are keys having a TRUE value each. This allows intersecting these options better via the YAML merging.

The VIE Schema, however, expects the settings eventually still as real, plain array, this is adjusted in the appropriate controller.
