<b>Subject:</b>	Side menu on the home page overlaps		
<b>Description</b>			
Hi,			
the side menu at the home site overlaps with the main menu.			
<b>Steps to reproduce:</b>			
- go to <a href="http://neos.typo3.org/homepage.html">http://neos.typo3.org/homepage.html</a>			
- scroll down to a new content section or click on a menu item in the side menu			
- scroll to the top ...			
Now the hover state of the menu item overlap with the hover of the main menu. I used the current Chrome, but it is also on the current Safari and Firefox. I did not test IE.			
In the Safari the side menu overlaps not as much as in the other browsers.
