Subject:	Menu.html - Empty Menu because auf missing letter		

Description

Menu.html rendered empty

    TYPO3.Neos/Resources/Private/Templates/TypoScriptObjects/Menu.html

By kickstarting a new site via flow, in the created Site-Package in Root.ts2 there is the menu set via menu = Menu without any template resource given. therefore the default will be used, wich is located in TYPO3.Neos ... Templates/TypoScriptObjects/Menu.html

Here is a variable mistake on line 4:

Now there is:

    <f:render section="itemsList" arguments="{item: item}" />

But it should be:

    <f:render section="itemsList" arguments="{items: items}" />

Difference is missing character s: {items: items} -> {items: items}

otherwise the generated menu is always empty.
