TYPO3 Version:	6.1
PHP Version:	
Complexity:	
Is Regression:	No
Sprint Focus:	
Subject:	1-2-3 Installer fails with "There is no connection to the database!"

Description

I just installed a fresh Ubuntu VM and was trying to install the TYPO3 6.1.7 Introduction Package.

Sadly, the 1-2-3 installer fails at the database setup step.

> There is no connection to the database!
> (Username: root, Host: localhost, Using Password: YES)
> Go to Step 1 and enter a valid username and password!

The login credentials are fine and it doesn't really matter which credentials I use. I've double checked them via the shell.

The issue is present on Windows hosts as well.
