

Core - Bug # 54346

Status:	Closed	Priority:	Should have		
Author:	Christian Weiske	Category:	Install Tool		
Created:	2013-12-11	Assigned To:			
Updated:	2014-03-18	Due date:			
TYPO3 Version:	6.2				
PHP Version:					
Complexity:					
Is Regression:	No				
Sprint Focus:					
Subject:	Install tool: "/" is not a directory"				
Description					
<p>The install tool of recent git master tells me in the "folder structure" check:</p> <p>/ is not a directory</p> <p>Path /var/www/hosts/bogo should be a directory, but is of type link</p> <p>I collect all document roots in one directory so I can utilize virtual mass hosting (automatically makes vhosts available when a directory is available). In this directory, I symlink all vhost directories. This should not be an error.</p>

History

#1 - 2013-12-12 00:33 - Markus Klein

See #53037

#2 - 2014-02-02 10:50 - Andreas Wolf

- Status changed from New to Accepted

I think this is a duplicate of #53037.

#3 - 2014-03-18 10:28 - Ernesto Baschny

- Status changed from Accepted to Closed

This was fixed in #52668. New defaults are 0664 and 2775.
